# INSECT PEST SURVEY

Bureau of Entomology, U.S.D.A.  
and  
State Entomological Agencies, cooperating.

-----p-----  
Special Report No. 17, c. 12

March 9, 1922.

-----  
SEED CORN MAGGOT ATTACKING POTATOES (Hylemyia cilicrura Rond.)

Under date of March 7, Mr. R. W. Leiby, Assistant  
Entomologist of the North Carolina Department of Agriculture,  
sends the following communication.

"The potato seed maggot is being complained of rather  
frequently as destroying the seed of early Irish potatoes in the  
eastern part of North Carolina. This is apparently a recurrence  
of the outbreak that we experienced last year."

Last year the earliest record of this pest came in  
from North Carolina on April 1.

INVESTIGATIVE SURVEY

Division of Entomology, U.S.D.A.  
and  
State Entomological Agencies, cooperating.

March 9, 1932.

REED CORN MAIZE ATTACKING POTATOES (HYPERA ALLIARUM PEARCE)

Under date of March 7, Mr. H. W. Bailey, Assistant  
Entomologist of the North Carolina Department of Agriculture,  
sends the following communication.

"The potato seed market is being complained of rather  
frequently as destroying the seed of early Irish potatoes in the  
eastern part of North Carolina. This is apparently a recurrence  
of the outbreak that we experienced last year."

Last year the earliest record of this pest was in  
the North Carolina on April 1.
